

# Configure S3 browser to access the Vaultastic Open Store Bucket

## Step 1: Get the access credentials of the Vaultastic Open Store

1. **Login to your Vaultastic account** using an id with admin privileges
2. Navigate to the **Open Store App**
3. Click on **the profile icon** in the top left corner
4. **Click on Settings**
5. Select **Open Store Credentials**
6. In the pop-up dialog box, select the **Vaultastic Domain**
7. To generate an access key for the Open Store, click on the **Activate button**
8. On successful generation, the Download button will be enabled. Click **Download** to download a CSV containing the access credentials.

## Step 2: Download and configure S3 browser

1. Download the S3 browser from the site <https://s3browser.com> (<https://s3browser.com/>)
  2. Launch the S3 browser App.
  3. **Add New Account** window displays on the screen.
  4. Provide the s3 bucket credentials as follows:
  5. Open the welcome mail received on your registered email id when you signed up for Vaultastic V4. Refer to the access key details shared with you via welcome mail.
    1. Enter the **Account Name**. This can be any name that will help you identify the task.
    2. Provide the **Access key ID** from the CSV file generated in step 1
    3. Enter the **Secret Access Key** from the CSV file generated in step 1
    4. Select to enable the **Use secure transfer (SSL/TLS) option**
    5. Click the **Add New Account** button to proceed
    6. A warning message displays on the screen saying **"You are not allowed to get buckets list. Would you like to add an External Bucket? "** Click **Yes** to add an external bucket.
    7. On the pop-window, **enter the bucket name** as mentioned in the CSV file generated in step 1
    8. **Click the Add External Bucket button to continue**
