

Step 2: Create the Send Connector in Exchange 2013

1. Select **Mail Flow > Send Connectors**
 2. Click **+** to add a new send connector
 3. Enter **Vaultastic** in the **Name** field.
 4. Select **Custom** as the **Type** option
 5. Click **Next**
 6. Under the **Network** settings, select **Route mail to smart host**
 7. Click **+** to add a new smart host
 8. Enter the FQDN (fully qualified domain name) of the Vaultastic server in the format **o365-v4.vaultastic.com**. Click **Save**
 9. The new host will be listed under **Smart Host** in the **New Send Connector** Window. Click **Next**
 0. For the Smart host authentication, select **None** option. Click **Next**.
 1. Click **+** to add a new address space. Enter the FQDN as **{domainprefix}.vaultastic.com** server. Click **Next**.
 2. Click **+** to select. In the pop-up dialog, select the source **Exchange server**, then click **Add**. Click **OK**.
 3. Click **Finish**.
