Step 3: Enable Email Archiving in Zimbra

You can archive all email messages transacted by all/selected users on your Zimbra domain by adding archive details of those users in config file.

1. Log on as zimbra on the Zimbra server.

2. For each user, execute the command mentioned below

```
zmarchiveconfig enable {userid@domainname.com} archive-address userid@{domainprefix}.vaultastic.com archive-create false
```
