Add multiple migration jobs

Using the CSV import option, multiple jobs can be added through a single operation.

- 1. Create a CSV file (https://docs.mithi.com/home/faqs-about-the-historical-data-upload-application#how-do-i-create-a-csv-for-defining-multiple-jobs-) with the input parameters for the Job Type.
- 2. Login (https://docs.mithi.com/home/how-to-login-to-the-historical-data-upload-application) to the Historical Data Upload portal.
- 3. Select **New Job** from the top menu.

- 4. Click the **Import** button.
- 5. Click the **plus (+)** sign to browse and locate the CSV file from your machine.
- 6. Click the Add button to validate and upload jobs.

7. The system will validate all the jobs in the CSV and the status will be displayed on the screen.

8. On successful validation, uploaded jobs will be visible in the list of jobs and will be in the **Pending** state.

9. To verify or start all the jobs, Search (https://docs.mithi.com/home/how-to-search-for-a-migration-job-in-the-historical-data-upload-application) for the pending jobs and access the Start All or Verify All options from the menu on the top right.
