

# Verify the input parameters of a migration job

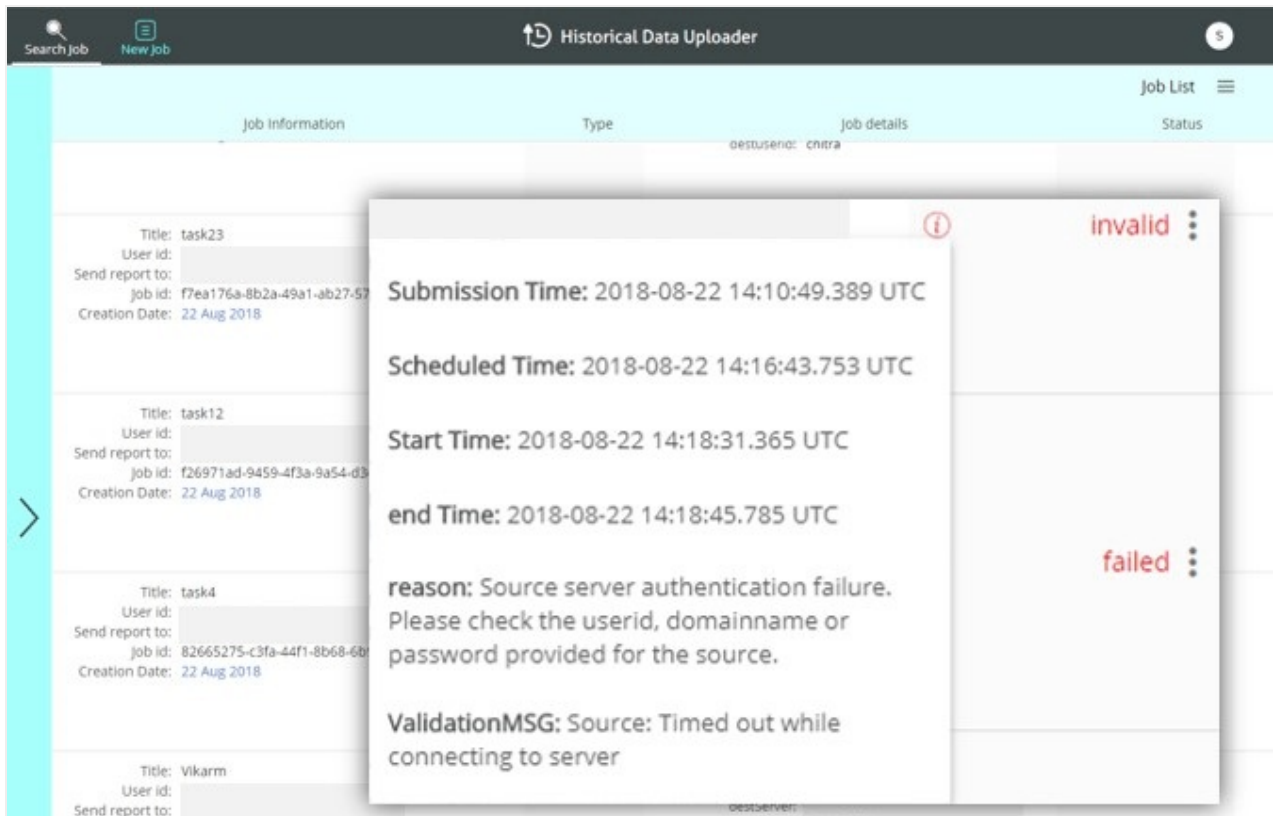

You can verify the parameters of a job in the Pending state.

1. In the **Status** column, hover the mouse over the **Options** icon (depicted by three vertical dots).
2. Click the **Verify** icon to submit the job for verification.

The system will verify the job parameters. If any of the parameters is incorrect, the job status will be marked as invalid. To view the details, hover the mouse over the information icon to the left of the status. [Edit the job \(https://docs.mithi.com/home/how-to-update-the-input-paramters-of-a-migration-job-in-the-historical-data-upload-application\)](https://docs.mithi.com/home/how-to-update-the-input-paramters-of-a-migration-job-in-the-historical-data-upload-application) to update.

job information		Type	job details		Status
Title	: Upload PST to Amin Vault	PST	pstname	: Amin_16-01-2019 01-15.pst	processed
