Configure POP email account in K9 Mail app

- Step 1: Install K9 Application
- Step 2: Go to the Add Account screen
- Step 3: Provide User Information
- Step 4: Choose account type
- Step 5: Provide Incoming Server Settings
- Step 6: Provide Outgoing Server Settings
- Step 7: Customize the account settings and finish the configuration

Manage your email account configured in K9 app

- View emails
- Composing an email
- Saving a copy of an email sent to the server
- Sort emails
- View IMAP Folders
- Update the password
- Remove the account

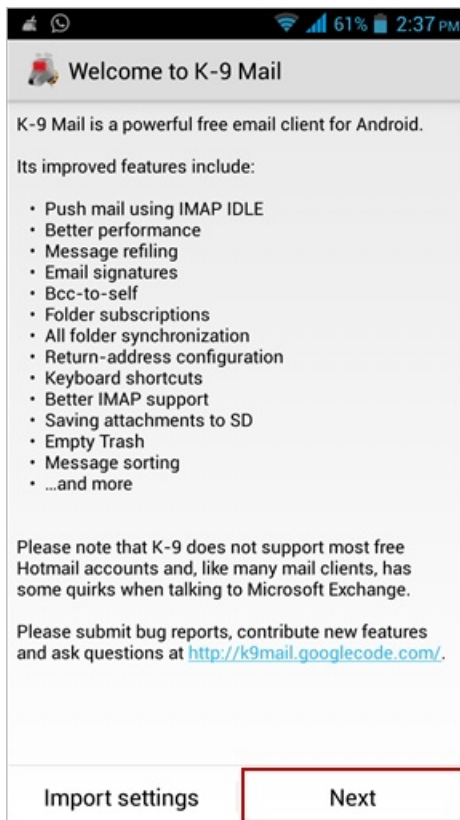

Configure an IMAP email in K9 Mail

Step 1: Install K9 Application

1. You need to install the [K9 Mail](https://play.google.com/store/apps/details?id=com.fsck.k9&hl=en) client from Google Play store on your mobile device.
2. Launch the K9 Mail app from the Home screen.

Step 2: Go to the Add Account screen

- When starting K-9 Mail for the first time, the **Welcome** screen displays to greet you. Tap **Next** to start the account creation wizard.

- Alternatively, to set up an additional mail account,
 - Go to the **Home** Screen and tap **K-9 mail** icon.
 - Press the **Menu** button and then tap **Add account** which displays Set up a new account screen.

Step 3: Provide User Information

On the **Set up a new account** screen, enter the following information

- i. **User id:** Provide User id of the account If you are using Mithi SkyConnect Trial account, provide user id which you have received in the Welcome Mail.
- ii. **Password:** Provide Password associated with the account If you are using Mithi SkyConnect Trial account, provide Password which you have received in the mail by the Mithi Team.

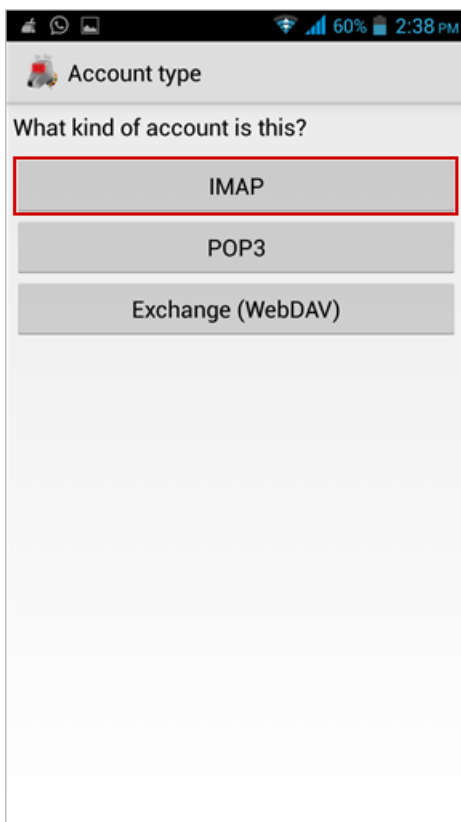

TIP : If you change the password in the future, an authentication error occurs. Application fails to connect and fetch emails from the server.

- iii. Tap **Manual setup** button to provide your account settings.

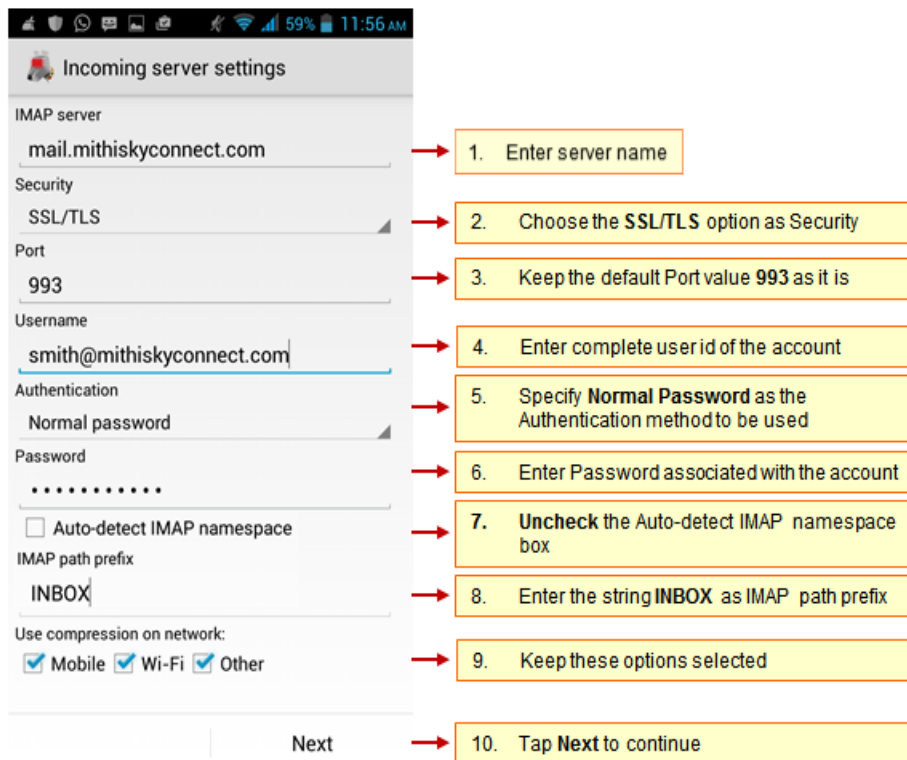

Step 4: Choose account type

- i. Select the **IMAP** option as the type of an email account you need to configure.

Step 5: Provide Incoming Server Settings

i. **IMAP Server:** Enter server name

Don't know your server name? [Access the online help](https://docs.mithi.com/home/faqs-on-accessing-skyconnect-application-on-mobile#how-to-access-help-to-configure-a-mobile-device-%C2%A0) (https://docs.mithi.com/home/faqs-on-accessing-skyconnect-application-on-mobile#how-to-access-help-to-configure-a-mobile-device-%C2%A0) to know the server settings required to configure your account.

- ii. **Security** : Select **SSL/TLS** to connect your email account
- iii. **Port** : Keep the default server port number **993** as it is
- iv. **User name:** Enter complete email address of your account
- v. **Authentication Type:** Specify **Normal Password** as the authentication method to be used
- vi. **Password:** Password entered on the Account Information screen populates here.
- vii. Uncheck the **Auto-detect IMAP namespace** box
- viii. Enter the string **INBOX** (in capital) in the **IMAP path prefix** box
- ix. Keep the **Use compression on network** options selected.
- x. Tap **Next** to continue.
- xi. K-9 Mail tries to connect to the server and verifies the incoming server settings.

Step 6: Provide Outgoing Server Settings

On the **Outgoing Server Settings** screen, provide your SMTP server details.

- i. **SMTP server** : Provide server name.

Don't know your server name? [Access the online help](https://docs.mithi.com/home/faqs-on-accessing-skyconnect-application-on-mobile#how-to-access-help-to-configure-a-mobile-device-%C2%A0) (https://docs.mithi.com/home/faqs-on-accessing-skyconnect-application-on-mobile#how-to-access-help-to-configure-a-mobile-device-%C2%A0) to know the server settings required to configure your account.

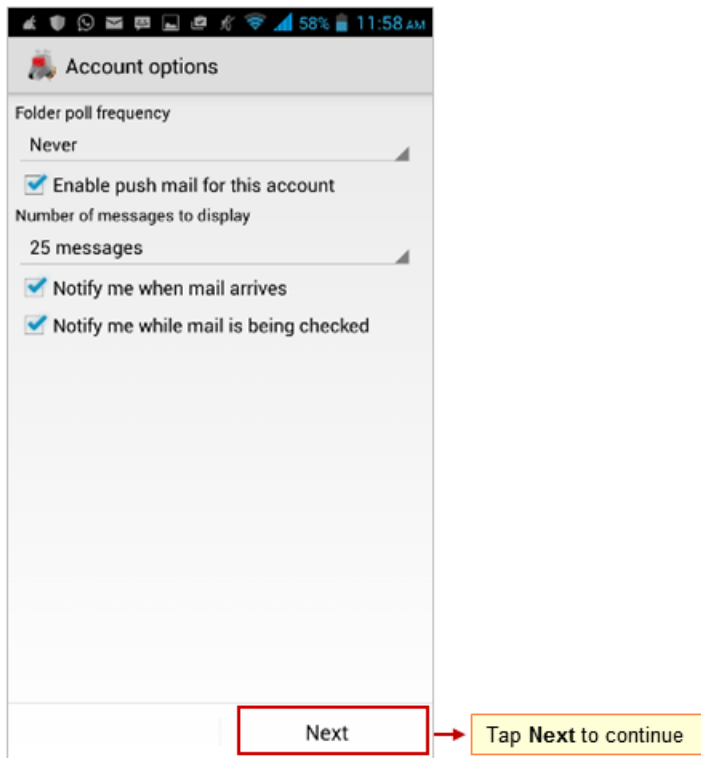

- ii. **Security** : Choose the **STARTTLS** option.
- iii. **Port** : Enter the value **587**.
- iv. Keep the **Require Sign-in** option selected.
- v. **User name & Password**: User name and password provided on the Account Setup screen populates here. Do not change the values for these fields.
- vi. Tap **Next** to proceed.
- vii. K-9 Mail tries to connect to the server and verifies the outgoing server settings. After verification Account options screen opens.

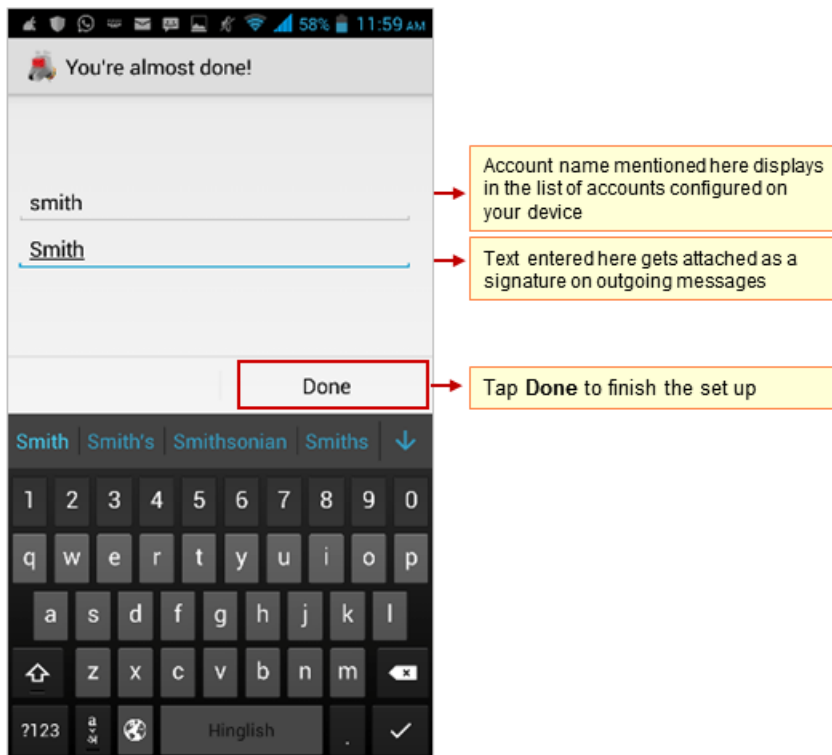

Step 7: Customize the account settings and finish the configuration

- Then, on the **Account options** screen, you can configure basic settings for the account and tap Next. These settings are specific to each account or mailbox you configure.

Tip to save the battery life of your device: Choose the option so that Android will fetch the data less frequently. For example, if you choose to fetch data for every 15 minutes, Android will wake up every 15 minutes for that. This could affect the battery life of your mobile.

- ii. Now, provide some additional account information,
- Give this account a **name** (optional): Enter name for the account which displays in the account list.
 - Type your name: Enter the text that you want display as a **signature** on outgoing messages.
 - To complete the setup, tap **Done**. K-9 saves and configures the mail account on your mobile.

iii.

Configure POP email account in K9 Mail app
