

Manage quarantine using the Email Digest

As an user, you will receive an email digest giving a list of email messages quarantined as per rules configured on the Secure Mail flow system. (The frequency and schedule of the digest is controlled by your domain administrator.)

Using the links on the digest, you can release quarantine mail to your Inbox and also approve the sender such that the quarantined mail is released and the sender is added to your white-list.

A single email digest will list up-to 100 such quarantined mail. To view the complete list of quarantined messages and blocked/ approved senders, log on to the end user quarantine console.
