

Step 4: Update the accepted domains list in O365

1. Navigate to the **Admin Center** > **Exchange** screen

2. Go to the **mail flow** => **accepted domains** option

3.

- Give a suitable **Name (the image below shows the sample domain name mithiconnectxf.org)**
- Enter your domain in the **Accepted Domains** list. (The image below shows the configuration for domain mithiconnectxf.org. Substitute with your domain name.)
- Choose the **Internal Relay** option
- Select the **Accept mails for all subdomains** option
- **Save** the accepted domains list

4.

Accepted domains are used to define which domains will be accepted for inbound email routing.

*Name:
mithiconnectxf.org

Accepted domain:
mithiconnectxf.org

This accepted domain is:

Authoritative: Email is delivered only to valid recipients in this Exchange organization. All email for unknown recipients is rejected.

Internal Relay: Email is delivered to recipients in this Exchange organization or relayed to an email server at another physical or logical location.

Make this the default domain.

Accept mail for all subdomains
