

Set a vacation reply of a user

1. Search the required user from the list of users on your domain.
 2. On the right pane, click the Mail section to view all the mail-related properties configured for the user.
 3. Enable the Auto-Reply option.
 4. Update the vacation reply for the user.
 5. Save to update the user properties.
 6. On successful updation, the application displays the status message on the screen.
