

Steps to migrate data from data files

Migrating this data to Vaultastic or SkyConnect is a two step process

Step 1: [Upload email data files to a S3 bucket](https://mithidocs.knowledgeowl.com/home/how-to-upload-email-data-files-to-s3-bucket) (<https://mithidocs.knowledgeowl.com/home/how-to-upload-email-data-files-to-s3-bucket>) on the Amazon Cloud

Step 2: Use the LegacyFlo application to migrate this email data to Vaultastic or SkyConnect.

- [Migrate email data stored in PST files](https://mithidocs.knowledgeowl.com/home/how-to-migrate-email-data-in-pst-files-using-the-legacyflo-application) (<https://mithidocs.knowledgeowl.com/home/how-to-migrate-email-data-in-pst-files-using-the-legacyflo-application>)
 - [Migrate data in EML files](https://mithidocs.knowledgeowl.com/home/how-to-migrate-email-data-in-eml-files-using-the-legacyflo-application) (<https://mithidocs.knowledgeowl.com/home/how-to-migrate-email-data-in-eml-files-using-the-legacyflo-application>)
 - [Migrate data stored in MBOX files](https://mithidocs.knowledgeowl.com/home/how-to-migrate-email-data-in-mbox-files-using-the-legacyflo-application) (<https://mithidocs.knowledgeowl.com/home/how-to-migrate-email-data-in-mbox-files-using-the-legacyflo-application>)
