

SkyConnect or Vaultastic

Overview

Using LegacyFlo, you can migrate data to and from SkyConnect/Vaultastic accounts using the IMAP protocol.

The request types available when migrating FROM SkyConnect/Vaultastic (Mithi as the source) are:

MITHI-S3-ZIP	To backup mailbox content of SkyConnect/Vaultastic accounts to S3 (https://mithidocs.knowledgeowl.com/home/imap-to-aws-s3)
--------------	---

The request types when migrating TO SkyConnect or Vaultastic (Mithi as the destination) are:

IMAP or IMAP-MITHI-IMAP	To migrate data using IMAP protocol from any mail server to SkyConnect or Vaultastic
O365IMAP or O365-MITHI-IMAP	To migrate data using the O365 IMAP protocol to SkyConnect or Vaultastic
GMAILIMAP or GMAIL-MITHI-IMAP	To migrate data using the GSuite IMAP protocol to SkyConnect or Vaultastic
EXCHANGEIMAP or EXCHANGE-MITHI-IMAP	To migrate data using the MS Exchange IMAP protocol to SkyConnect or Vaultastic

SkyConnect / Vaultastic Request Parameters

Note:

When syncing email data your IMAP server to SkyConnect / Vaultastic, only the Mail folder and its contents will be synced. This ensure that all mail (except the ones moved to the Trash or Spam folders) from the account are synced without any duplicates.

When [submitting requests](https://mithidocs.knowledgeowl.com/home/how-to-submit-a-data-migration-request-in-the-legacyflo-application) (<https://mithidocs.knowledgeowl.com/home/how-to-submit-a-data-migration-request-in-the-legacyflo-application>) to upload email data, the [Request type](https://docs.mithi.com/home/faqs-about-the-legacyflo-application#what-are-the-different-request-types-supported) (<https://docs.mithi.com/home/faqs-about-the-legacyflo-application#what-are-the-different-request-types-supported>) to be selected must have **SkyConnect / Vaultastic** as a destination.

SkyConnect as the destination

The parameters to be used when SkyConnect is the destination are as follows:

FIELD NAME	DESCRIPTION	SAMPLE VALUE
Destination user id	The user id on the SkyConnect . (Note: The id should not contain the domain name.)	"john"
Destination domain	Destination domain on SkyConnect	"baya.mithiskyconnect.com"
Destination user password	Password of the user on SkyConnect	Note: Passwords cannot contain special characters mentioned in the list given here (https://docs.mithi.com/home/faqs-about-migrating-email-data-using-imap-in-the-legacyflo-application#which-special-characters-are-allowed-in-the-source-or-destination-user-password-). Update the password before submitting the request.
Destination server	Hostname for the domain	"baya.mithiskyconnect.com"
Destination folder	Name of the destination folder to be created in the account. Mail will be imported in this folder. DO NOT use any reserved folder name on SkyConnect.	"Data27092018" Note: When submitting two or more requests to import data to the same destination mailbox, it is recommended to choose a different destination folder for each request. The reports generated at the end of a request enlist all the mail available in the folder imported using previous requests.

Vaultastic as the destination

The parameters to be used when Vaultastic is the destination are as follows:

FIELD NAME	DESCRIPTION	SAMPLE VALUE
Destination user id	The user id on the Vaultastic. (Note: The id should not contain the domain name.)	"john"
Destination domain	Destination domain on Vaultastic	"baya-com.vaultastic.com"

FIELD NAME	DESCRIPTION	SAMPLE VALUE
Destination user password	Password of the user on Vaultastic.	<p>Note: Passwords cannot contain special characters mentioned in the list given here (https://docs.mithi.com/home/faqs-about-migrating-email-data-using-imap-in-the-legacyflo-application#which-special-characters-are-allowed-in-the-source-or-destination-user-password-). Update the password before submitting the request.</p>
Destination server	Hostname for the domain	"baya-com.vaultastic.com"
Destination folder	<p>Name of the destination folder to be created in the account. Mail will be imported in this folder.</p> <p>DO NOT use any reserved folder name on Vaultastic.</p>	<p>"Data27092018"</p> <p>Note: When submitting two or more requests to import data to the same destination mailbox, it is recommended to choose a different destination folder for each request.</p> <p>The reports generated at the end of a request enlist all the mail available in the folder imported using previous requests.</p>

CSV file template for multiple SkyConnect/ Vaultastic request creation

Create a CSV (<https://docs.mithi.com/home/faqs-about-the-legacyflo-application#how-do-i-create-a-csv-for-defining-multiple-requests->)

file with a list of all the users and other details required to upload data. First row of the CSV file should contain field names and from second row provide the list of users and their details.
