[Want to submit multiple jobs using CSV?](#)

Preparation

- [Upload MAILDIR data files to S3 bucket \(https://docs.mithi.com/home/how-to-upload-email-data-files-to-s3-bucket\)](https://docs.mithi.com/home/how-to-upload-email-data-files-to-s3-bucket)

Import MAILDIR to SkyConnect

- After uploading the data files to S3, the next step in the process is to migrate the data into SkyConnect accounts using the LegacyFlo application.
- For each MAILDIR file submit a separate request.
- To submit multiple requests, manually create and upload a CSV. Use the help given in the following sections to define your requests.
- When [submitting a request \(https://docs.mithi.com/home/how-to-submit-a-data-migration-request-in-the-legacyflo-application\)](https://docs.mithi.com/home/how-to-submit-a-data-migration-request-in-the-legacyflo-application) to upload MAILDIR data, select **MAILDIR-MITHI-IMAP** as the **Request type**.
- Provide **MAILDIR file details under the Source information** section.
- Provide **Mithi (SkyConnect / Vaultastic) server details under the Destination information** section.
- Refer to the following screenshot and table to understand the description and sample values for the fields.

Source Information (MAILDIR Files)

Destination Information (SkyConnect/ Vaultastic)
