- Using LegacyFlo you can migrate user's live email data between mail platforms.
- LegacyFlo allows to migrate data from Gmail, O365, Exchange, Other IMAP server

Preparation

Preparation for source server

Preparation for destination server

Migrate data between mail platforms

- Once the preparation is done, you can start the migration by [submitting migration requests to LegacyFlo](#) (<https://docs.mithi.com/home/how-to-submit-a-data-migration-request-in-the-legacyflo-application>).

Note: This step has to be executed for each mailbox to be migrated.

- The request type used to submit a LegacyFlo request will depend on the source type. The table below gives the details of the preparation and request parameters for different source types:
