Baya 4 - Insanely productive web UX - Now available for you

View presentation on SlideShare (https://www.slideshare.net/MithiSkyConnect/baya-4-insanely-productive-web-ux-now-available-for-you)

About this webinar

More than 65% of our user base accesses their email account using Baya, Mithi's web client platform, and they are about to experience a significant burst in productivity.

Baya4, a significant upgrade to the web access platform on our cloud, is now in the roll-out phase and will be available to our SkyConnect user base shortly.

Via this webinar, we updated you on the new capabilities in Baya4 and how they can make it even easier for your users to consume the collaboration applications viz. Email, Calendar, Chat, Tasks, and Contacts from multiple devices and form factors.

www.mithi.com

In this Webinar, we covered:

- Introduction to the Baya4 web platform

- Updates to the UX

- Functional comparison

- Productivity Hacks

- Advantages of Baya over a desktop client

- Schedule for roll-out

- Impact on end-users after the roll-out

- What's coming up next

Speaker:

Aditi is one of the co-founders at Mithi (https://www.mithi.com/). She has been leading product development for almost 15 years and with an overall experience of nearly 3 decades working with technology, creating widely used products and managing operations. Aditi is the most sought after person for technical advice. She regularly contributes to Mithi's technology blog (https://blog.mithi.com/).
