

Import from a data file to Vaultastic V4 Active store

Overview

- Using LegacyFlo you can import email data stored in data files to the Vaultastic V4 active store
- LegacyFlo allows you to import data stored in PST, EML, MBOX, or MAILDIR format
- Importing data from a data-file to a Vaultastic V4 active store is a two-step process:
 - Step 1: Upload the data files to a S3 bucket on the Amazon Cloud
 - Step 2: Use the LegacyFlo application to migrate this email data to the Vaultastic V4 Active store

Preparation

- The LegacyFlo application can ingest data in EML, MBOX, MAILDIR, or PST format into the Vaultastic V4 Active store.
- These files have to be uploaded to the S3 bucket in the following manner

PST	<ul style="list-style-type: none">• Uncompressed• One file per Vault• The maximum PST file size supported by the application is 48GB
EML / MBOX / MAILDIR	<ul style="list-style-type: none">• Compressed in ZIP format• One ZIP file per Vault• The maximum zip file size supported is 48GB (uncompressed 48GB)

Upload email data files to an S3 bucket on the Amazon Cloud

Migrate data to the Vaultastic V4 Active store

- Once the data is uploaded to the S3 bucket, you can start the migration by [submitting migration requests](https://docs.mithi.com/home/how-to-submit-a-data-migration-request-in-the-legacyflo-application) (<https://docs.mithi.com/home/how-to-submit-a-data-migration-request-in-the-legacyflo-application>) to LegacyFlo.

Note: This step has to be executed for each mailbox to be migrated.

- The request type used to submit a LegacyFlo request will depend on the source type. The table below gives the details of the preparation and request parameters for different source types:

REQUEST TYPE	DESCRIPTION
PST-VAULTASTIC4	<ul style="list-style-type: none">• Use this request type to import data from a PST file to a Vault.• Click here (https://mithidocs.knowledgeowl.com/home/pst-vaultastic4) for the details of the request parameters.

REQUEST TYPE	DESCRIPTION
EML-VAULTASTIC4	<ul style="list-style-type: none">• Use this request type to import data from an EML file to a Vault.• Click here (https://mithidocs.knowledgeowl.com/home/eml-vaultastic4) for the details of the request parameters.
MBOX-VAULTASTIC4	<ul style="list-style-type: none">• Use this request type to import data from an MBOX file to a Vault.• Click here (https://mithidocs.knowledgeowl.com/home/mbox-vaultastic4) for the details of the request parameters.
MAILDIR-VAULTASTIC4	<ul style="list-style-type: none">• Use this request type to import data from a MAILDIR file to a Vault.• Click here (https://mithidocs.knowledgeowl.com/home/maildir-vaultastic4) for the details of the request parameters.
