

# SpamTitan Admin training for SkyConnect Customers

[Link to download a copy of the presentation \(https://www.slideshare.net/secret/BePyMwFIH6ozcd\)](https://www.slideshare.net/secret/BePyMwFIH6ozcd)

Mithi SkyConnect now has an upgraded Email Security Gateway (ESG) that runs on the SpamTitan platform.

Besides rock-solid malware protection, SpamTitan improves your experience of managing email security with these new capabilities:

- An improved Domain Management console giving you more control.
- Blacklist and Whitelist control in your console, boosting productivity.
- Export options for reports enabling offline analysis.
- A more friendly and usable quarantine digest report, including outbound emails too.
- More possibilities to automate routine tasks with their API.

In this webinar, we cover

1. How to Login into your SpamTitan Domain Group Admin console
2. How to choose the proper role
3. Adding other domain admins
4. Switching roles
5. How to Whitelist/Blacklist emails and domains
6. Quarantine management
7. Tracing mail
8. Generating Reports
9. End-user quarantine report
10. Advanced filter rules

## 11. Q&A

### About the Speaker

Aditi is one of the co-founders at [Mithi](https://www.mithi.com/). She has been leading product development for almost 15 years and with an overall experience of nearly 3 decades working with technology, creating widely used products and managing operations. Aditi is the most sought-after person for technical advice. She regularly contributes to [Mithi's technology blog](https://blog.mithi.com/).
