

Vaultastic Ver 4.4.0.0

14th September 2021

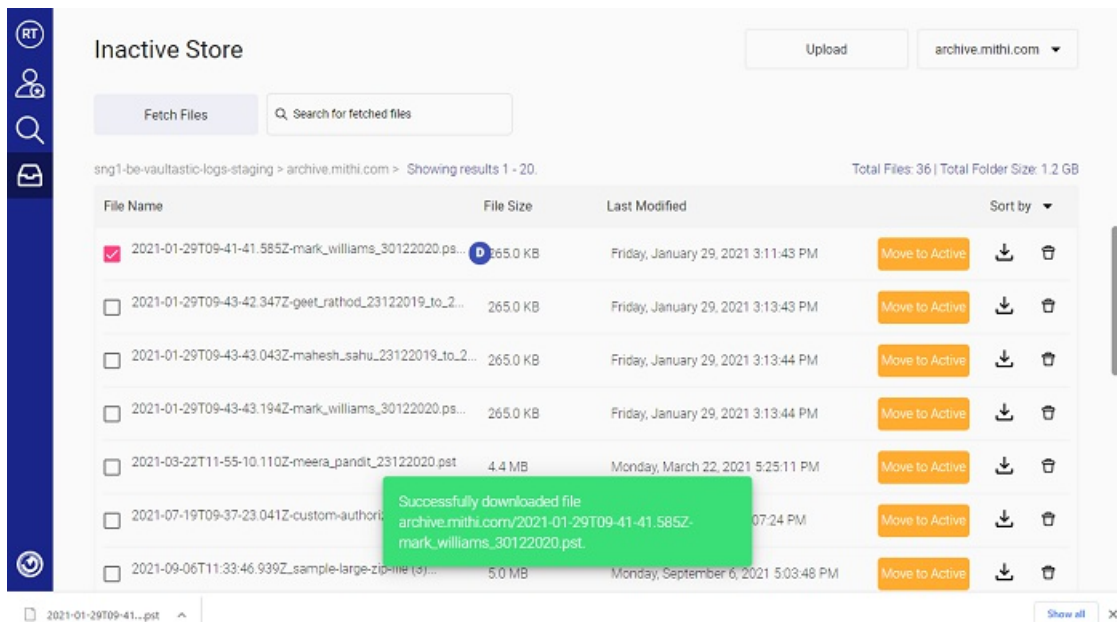

Revision information

Vaultastic V4, version 4.4.0.0

New Features

Improve Productivity with In-App Upload and Download of large files (up to 100 GB)

The download/upload function (now) integrated with the Vaultastic Inactive Store App, smoothenes data import and extraction for the Vaultastic Administrator and eliminates the need to use another application (S3 browser) for this. One more step to a more productive UX.
