

Step 2: Add a route for the Vaultastic domain

On the outgoing mail server, add an SMTP route to route all mails for your Vaultastic domain to o365-v4.vaultastic.com (<https://o365-v4.vaultastic.com>)

For example, if your Vaultastic domain is `acmecorp-com.vaultastic.com`, then the route should be as follows:

Route all mail for `acmecorp-com.vaultastic.com` () to o365-v4.vaultastic.com (<https://o365-v4.vaultastic.com>)
