

Enabling GMail IMAP access

IMAP sync of Gmail requires that IMAP is full enabled. And here is how to check if your Gmail has IMAP enabled:

1. Log into your Gmail account at <https://mail.google.com>.
2. Go to your Gmail settings and select “Forwarding and POP/IMAP” (the direct link should be <https://mail.google.com/mail/u/0/#settings/fwdandpop>). Please verify the following:
 1. “Enable IMAP” should be selected.
 2. “Do not limit the number of messages in an IMAP folder” should be selected.
 3. Save the above settings.

- 3.
4. Go to the “Labels” tab (the direct link should be: <https://mail.google.com/mail/u/0/#settings/labels>).
 - a. Verify that “All Mail” have “Show in IMAP” enabled.
 - b. If you are syncing emails from a label or sharing a label, you need to ensure that label and all sub-labels in that label have IMAP enabled.

5.

The screenshot shows the Gmail Settings page for the 'Labels' tab. The search bar at the top is highlighted with a yellow circle containing the number '3'. The 'Labels' tab is selected, and the 'All Mail' label is highlighted in the list, with a yellow circle containing the letter 'a' pointing to it. The 'All Mail' label is currently set to 'show' and 'hide' options are visible. The 'Show in IMAP' checkbox is checked for this label.

System labels	show	hide	show if unread	Show in IMAP
Inbox				<input checked="" type="checkbox"/>
Starred	show	hide		<input checked="" type="checkbox"/>
Snoozed	show	hide		<input checked="" type="checkbox"/>
Important	show	hide		<input checked="" type="checkbox"/>
Chats	show	hide		<input type="checkbox"/>
Sent	show	hide		<input checked="" type="checkbox"/>
Scheduled	show	hide	show if unread	<input checked="" type="checkbox"/>
Drafts	show	hide	show if unread	<input checked="" type="checkbox"/>
All Mail	show	hide		<input checked="" type="checkbox"/>
Spam	show	hide	show if unread	<input checked="" type="checkbox"/>
Trash	show	hide		<input checked="" type="checkbox"/>
