VAULTASTIC4-M365API

Table of Contents

Overview

- This document contains parameter details required when submitting a request to migrate data using LegacyFlo (https://docs.mithi.com/home/how-to-submit-a-data-migration-request-in-the-legacyflo-application)

- Select **VAULTASTIC4-M365API** request type to migrate data from **Vaultastic Active Store to a mailbox on M365.**

- In the **VAULTASTIC4-M365API** request type, **Vaultastic Active Store** will be the **source** and **a M365 mailbox** will be the **destination**

- Before we can submit these requests, make sure that the necessary preparations on M365 have been done.

Step	Instructions
Generating M365 Graph API access credentials for accessing the mailbox using API	Follow the instructions given here (https://docs.mithi.com/home/getting-access-to-the-m365-graph-api).
Delegate access for M365 mailboxes (to be done for all mailboxes)	Follow the instructions given here (https://docs.mithi.com/home/preparation-of-o365-servers-by-enabling-imap-access-to-mailboxes).

Source information (Vaultastic V4)

FIELD NAME	DESCRIPTION	SAMPLE VALUE (VAULTASTIC4)

FIELD NAME	DESCRIPTION	SAMPLE VALUE (VAULTASTIC4)
User ID	User id on Vaultastic 4 domain whose data needs to be imported **Note**: The id should not contain the domain name.	"john.smith"
Domain	Source domain on Vaultastic 4	"baya-com.vaultastic.com"
Password	Password of the user on the Vaultastic 4 domain	**Note:** Passwords cannot contain special characters mentioned in the list given here (https://docs.mithi.com/home/faqs-about-migrating-email-data-using-imap-in-the-legacyflo-application#which-special-characters-are-allowed-in-the-source-or-destination-user-password-). Update the password before submitting the request.
Server	IP address or host name of the domain on Vaultastic 4	"baya-com.vaultastic.com"

Source mail type

Enter the primary email id: This ID is used to filter the mail from the vault on the Vaultastic Active Store. Only mails transacted by this user will be uploaded to the mailbox on M365.

Choose one of the following

Incoming	Upload only the mail received by the user specified. The mails will be uploaded to the **Incoming** subfolder in the destination folder specified.
Outgoing	Upload only the mail sent by the user specified. The mails will be uploaded to the **Outgoing** subfolder in the destination folder specified.

www.mithi.com

All	Upload all the mail, sent and received by the user specified. The mails will be uploaded to the Incoming and Outgoing subfolders in the destination folder specified.

Source Filter by date range

FIELD NAME	DESCRIPTION	SAMPLE VALUE
Since (YYYY-MM-DD)	Start date from which to sync mail. The mail transacted AFTER the start date and BEFORE the end date will be synced.	2019-01-01
Before (YYYY-MM-DD)	End date till which to sync mail. The mail transacted AFTER the start date and BEFORE the end date will be synced.	2019-02-01

Destination M365 mailbox

User ID	Email ID on M365. Should not contain the domain name.
Domain	Domain hosted on M365
Folder	Folder to which the mails have to be uploaded

Want to submit multiple jobs using CSV?

To upload multiple jobs using a CSV, create a CSV file (https://docs.mithi.com/home/how-to-submit-multiple-data-migration-requests-in-legacyflo-application#create-a-csv-for-defining-multiple-requests) with a list of all the users and other details required to upload data.
