

# Release Notes

4th Jan 2025

Improvements to **Outbound Reports** (<https://docs.mithi.com/home/clarstream-outbound-reports>)

The two ClrStream Outbound daily reports are now consolidated into a single report. The reports are generated daily and sent to the registered technical contact email id.

The report contains the overall outbound mail statistics including the number of mail successfully delivered and the number of mails that were bounced or deferred.

Detailed CSV reports for each are also available for download via links in the email. Links are valid for 7 days.

1st Nov 2024

## New Application Released

ClrStream Outbound Service now gives you access to the web based ClrStream Outbound Campaigns Application. Using this application, administrators can manage a contact list and campaigns to the contacts. For details refer to the [documentation here](https://docs.mithi.com/home/using-the-clarstream-outbound-application-to-send-mail) (<https://docs.mithi.com/home/using-the-clarstream-outbound-application-to-send-mail>).

15th Oct 2024

## ClrStream Outbound Reports Released

ClrStream Outbound service administrators can now subscribe to two daily reports. These are

- ClrStream Outbound bounce report
- ClrStream Outbound successful delivery report

For details refer to the [documentation here](https://docs.mithi.com/home/clarstream-outbound-reports) (<https://docs.mithi.com/home/clarstream-outbound-reports>).
